

Special Sessions — Table of Contents

Special Session: Reservoir sedimentation in semi-arid and arid environments. A comparative analysis from vulnerability of climate change in sensitive environments

How can Flash Flood, Snowmelt, Topography, and Land Use Changes Affect Soil Erosion and Reservoir Sedimentation in a Semi-Arid Mountainous Watershed Located in the Moroccan High Atlas? <i>Myriam Benkirane, Abdelali Gourfi, Agustín Millares, Nour-Eddine Laftouhi and Said Khabba</i>	SS-1
Two-Dimensional Depth Averaged Numerical Modelling of Flow Pattern and Sedimentation in Shallow Reservoirs <i>EL Mehdi Chagdali, Cédric Goeur, Benjamin Dewals, Sébastien Erpicum, Matthieu Secher, Rem-Sophia Mouradi and Kamal El Kadi Abderezzak</i>	SS-9
Analysis of Reservoir Sedimentation Impact on Water Transfer Systems for Water Scarcity Alleviation in Arid and Semi-arid Zones: Case Studies from Morocco <i>Dalila Loudyi, Soumia Saghiri and Ayoub Bouhamid-Alaoui</i>	SS-18
Sedimentation and Drains' Clogging in Recharge-Flood Protection Dams in Arid Areas: Lessons Learned from Oman <i>Ali Al-Maktoumi, Anvar Kacimov, Shahad Al-Yaqoubi, Said Al-Ismaily, Sameh A. Kantoush, Mohamed Saber and Tetsuya Sumi</i>	SS-23
Estimating Sediment Yield and Morphological Changes in Dry Reservoirs: Case Study Wadi Assarin, Oman <i>Sameh A. Kantoush, Mahmood M. Al-mamari, Tahani Al-harrasi, Mohamed Saber and Tetsuya Sumi</i>	SS-31
Sediment Yield Modelling and Possible Mitigation Measures for Thwake Dam in Kenya <i>Kuria Kiringu, Gerrit Basson, Eddie Bosman and Jeanine Vonkeman</i>	SS-38
Management of Extreme Sedimentation in a Reservoir in a Semi-Arid Region <i>Gerrit R. Basson, Nikolaos Efthymiou and George W. Annandale</i>	SS-51
The Characteristics Sedimentation Process of Cetian Reservoir in Sanggan River, China <i>Liu Chunjing, He Zhenping, Ren Yu, Gu Leilei, Liu Fei, Geng Xu, Zhang Lingfeng and Chen Yue</i>	SS-60

Special Session: Integrating ecohydraulics and ecohydrology in environmental flow assessments

Regional Eflows Design using Geo-Hydro-Eco Functional Archetypes <i>Belize Lane, Gregory B. Pasternack, Herve Guillon Anzy Lee and Samuel Sandoval-Solis</i>	SS-69
---	-------

Special Session: Environmental hydraulics related to aquaculture

Impact of Barrier Island Urbanization on Groundwater Discharge and Bioactive Solute Transport in Present Climate Scenario: Implications for Nearshore Fisheries <i>Elena Sánchez-Badorrey, Beatriz Ruiz-Sierra and Juan Flores-Gallardo</i>	SS-75
Assessment of aquaculture rafts exposure at river-borne substances using numerical modelling <i>Chen Yang, Manel Grifoll, Manuel Espino Margarita Fernández-Tejedor Marta F. Pedrera-Balsells and Agustín Sánchez-Arcilla</i>	SS-80

Mitigation of oxygen decline in a deep fjord using submerged fresh water SS-90
Jarle Berntsen, Dag Aknes and Elin Darelius

Special Session: Ecohydraulics 2021: Novel methods to investigate flow-biota interactions numerically, in the lab and in the field

On The Estimation of Real-Scale Hydrodynamic Features of Vegetated Channels through UAV-based Thermography SS-94
Giuseppe Francesco Cesare Lama and Mariano Crimaldi

Sediment Capture by Seagrass Blades Under Oscillatory Flow SS-101
Aina Barcelona, Carolyn Oldham, Jordi Colomer, Jordi Garcia-Orellana and Teresa Serra

Biomechanical Replication of Salt Marsh Vegetation using Resin 3D Printing SS-106
Kara Keimer, Viktoria Kosmalla, Oliver Lojek and Nils Goseberg

Experimental investigation of wave and current interactions with immature *Spartina alterniflora* salt marsh canopies SS-115
Behnaz Ghodoosipour, Amanj Rahman, Paul Knox, Andrew Cornett and Enda Murphy

Special Session: Green infrastructure and sustainable urban drainage systems

Sustainable Urban Drainage Systems Improvement and Strategic Management for Long-Term Success SS-123
Jose Anta, Joaquín Suárez, Ignacio Andrés-Doménech and Jorge Rodríguez-Hernández

Smart Design of Green Drainage Infrastructure at the Local Scale Using the Dual Drainage Model Iber-SWMM SS-131
Esteban Sañudo, Albert Chen, Luis Cea, Jerónimo Puertas and Barry Evans

Hydrological and environmental assessment of Sustainable Urban Drainage Systems (SuDS) case of study campus of Universidad Nacional de Colombia-Bogotá SS-136
Diana Beltran-Huertas, John Sandoval-Barrera, Nestor Mancipe-Muñoz and Maria Fernanda Riano-Neira

Green Roof Hydrological Performance: Monitoring, Modelling and Performance Metrics SS-146
Virginia Stovin, Simon De-Ville and Zhangjie Peng

Adapting Urban Planning Strategies for Nature-based Solutions Integration in Bogotá (Colombia) – The euPOLIS project SS-153
Juliana Uribe Aguado and Juan Pablo Rodríguez Sánchez

Introducing SUDS Guidelines at a Local Scale: three Case Studies in Spain SS-161
Sara Perales Momparler, Miguel Rico Cortés, María Soledad Checa Sánchez, Manuel de Pazos Liaño, Cristóbal Badenes Catalán, Inés Beltrán Pitarch and Laura de la Fuente García

Special Session: Implementing Nature Based Solutions – bringing science to practice

Advances in implementing and promoting Nature-based Solutions in urban areas – A real-world lab experience from Costa Rica SS-169
Jochen Hack

A combined legal-hydrological evaluation method for Green Infrastructure in urban Costa Rica SS-181
Conrad W. Schiffmann, Jose Ricardo Bonilla Brenes and Jochen Hack

Challenges for the use of Mangrove Forests as Nature-Based Solutions in Aotearoa New Zealand: from the Physical to the Social-Environmental SS-190
Julia C. Mullarney and Karen T. Fisher

Proceedings of the 39th IAHR World Congress
19–24 June 2022, Granada, Spain

Knowledge Gaps in NBS Implementation for Managing Water Quality Challenges and SDG Approaching in a Mediterranean Area SS-199
Mirli Anastasia, Latinopoulos Dionissis and Kagalou Ifigenia

The International Guidelines on Natural and Nature Based Features for Fluvial Flood Risk Management: the concept and the way forward SS-209
Ralph Schielen, Chris Spray, Chris Haring, Jo Guy and Lydia Burgess-Gamble

Special Session: The shallow water model intercomparison session: Benchmarking overland flow simulations

Application of the fully implicit DuMux shallow water model for rainfall runoff modelling SS-213
Martin Utz and Leopold Stadler

Comparison of GeoClaw and HEC-RAS for Numerically Modeling of Dam Failure and Additional Uses for GeoClaw Shallow Water Solver SS-217
Hannah Spero and Donna Calhoun

The Shallow Water Model Intercomparison Session: Hydroinformatics Modeling System (hms/hms++) SS-225
Lennart Steffen, Franziska Tügel and Reinhard Hinkelmann

Extension of 2D Shallow Water Models to Hydrological Modelling SS-235
Luis Cea, Ernest Bladé, Orlando García-Feal, Marcos Sanz-Ramos, Moncho Gómez-Gesteira and Juan F. Farfán

PROMAIDES: A State-of-the-Science Flood Risk Management Tool SS-245
Shahin Khosh Bin Ghomash, Roman Schotten, Daniel Bachmann

Benchmarking 2D Shallow Water Models in complex case studies: the 2017 Mandra (Greece) flood SS-255
Vasilis Bellos, Pierfranco Costabile, Carmelina Costanzo and John Kalogiros
